

Fakhir Ahmed Khan

Full-Stack Developer

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in the MERN stack and Next.js, with 3+ years of self-directed learning and 30+ deployed projects spanning SaaS platforms, AI-powered tools, and developer utilities. Comfortable across the stack — responsive React/Next.js frontends, Node.js/Nest.js REST APIs, and MongoDB/MySQL data layers — with hands-on experience integrating LLMs into production-style applications. Currently completing Grade 12 (STEM) while actively building and shipping real software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Vite, Zustand, React Query, React Native (Expo)

Backend: Node.js, Nest.js, Express.js, REST API design, Prisma ORM

Databases: MongoDB, MySQL

AI / Data: LLM integration (DeepSeek-R1, Qwen), Vercel AI SDK, NumPy, Pandas, EDA & data cleaning

DevOps & Tools: Git, GitHub, Docker, Vercel, Postman, Swagger

Testing: Vitest

PROFESSIONAL EXPERIENCE

Frontend Development Intern — CodeAlpha · 2025

- Built responsive, consumer-facing UI components during a focused frontend engineering internship.
- Developed reusable React components and applied state-management patterns to ensure cross-device compatibility.

PROJECTS (30+ on GitHub)

DataSynthex.io — Data Insight Assistant

Next.js · Python · TypeScript · Tailwind CSS · Vercel AI SDK

- Built an AI-powered analytics web app that automates exploratory data analysis (EDA) on user-uploaded datasets.
- Integrated DeepSeek-R1 and Qwen reasoning models via the Vercel AI SDK to turn natural-language prompts into structured analysis.
- Implemented automated file validation, missing-value handling, and dataset cleaning ahead of analysis.

StockPro — B2B SaaS

React · Vite · TypeScript · Tailwind CSS

- Built an inventory and stock-management dashboard with a responsive, data-dense interface.
- Implemented tier-based feature gating to restrict premium UI options by account level.
- Optimized the core layout to render large datasets smoothly without UI lag.

CVGenerator — SaaS

React · TypeScript · Tailwind CSS [Live Demo](#) · [Source](#)

- Built an ATS-friendly resume generator with instant, real-time preview.
- Shipped the full product lifecycle from UI design to production deployment on Vercel.

AI Agent Platform

Next.js · TypeScript · LLM APIs [Live Demo](#) · [Source](#)

- Built a platform to configure, deploy, and monitor autonomous AI agents.
- Implemented model-endpoint routing and asynchronous API handling across the stack.

EDUCATION

Grade 12 — Higher Secondary Education (STEM), American Diploma — International Schooling · 2026 (expected)

Full-Stack Development Bootcamp (MERN) — [Bootcamp Provider Name] · 2024

Web Development Specialization — [Bootcamp Provider Name] · 2024

Self-Directed Programming Education — Independent Learning · 2023

CERTIFICATIONS

- HackerRank: SQL (Basic), JavaScript (Basic), Python (Basic), CSS (Basic) — 2025
- freeCodeCamp: Responsive Web Design — 2025
- Simplilearn / freeCodeCamp: JavaScript for Beginners, Introduction to CSS, Introduction to Front-End Development — 2025
